

Get Published in the New *IEEE Open Journal of Antennas and Propagation*

**Submit a paper today to the premier
new open access journal in antennas
and propagation.**

IEEE introduces the new *IEEE Open Journal of Antennas and Propagation (OJAP)*, the first fully open access journal from the IEEE Antennas and Propagation Society (AP-S), dedicated to publishing high quality articles on the latest developments in antennas and propagation.

We invite you to be among the first to have your article peer-reviewed and published in the new journal. This is an exciting opportunity for your research to benefit from the high visibility and interest the journal's marketing launch will generate. Your research will also be exposed to 5 million unique monthly users of the IEEE *Xplore*[®] Digital Library.

The *IEEE Open Journal of Antennas and Propagation* will draw on IEEE's expert technical community's continued commitment to publishing the most highly-cited content. The Editor-in-Chief, Konstantina S. Nikita, Professor at the National Technical University of Athens, will work closely with an Advisory Board of pioneering contributors in antennas and propagation, along with a dedicated team of Associate Editors.

The rapid peer-reviewed process targets a publication time frame of 10 weeks for most accepted papers. This journal is fully open and compliant with funder mandates, including Plan S.

Submit your paper today!

Submission to ScholarOne is now open with launch of the new *IEEE Open Journal of Antennas and Propagation* in IEEE *Xplore* expected in early 2020.

Be among the first authors to publish in the *IEEE Open Journal of Antennas and Propagation*

The IEEE Antennas and Propagation Society's (AP-S) mission is to provide the antennas and propagation community with a high-quality, peer-reviewed gold open access journal that fosters technological innovation and excellence for the benefit of humanity while meeting author needs to publish within their funding requirements.

AP-S is regarded as a trusted and unbiased source of technical information for dialog and collaboration to advance technology within the antennas and propagation community. The Antennas and Propagation Society is led by researchers and technology professionals who are at the center of distinguished antennas and propagation communities where readers and authors already come together.

Leverage IEEE's publication expertise and strength

IEEE articles are indexed by major technology databases, including Web of Science and Scopus.

IEEE publications are among the most cited journals in US and European new technology patents.

IEEE provides tools to assist authors with their publishing needs, including article templates and a graphics analyzer.

AP-S members receive discounts on Article Processing Charges (APC).
